

Meet the Team ...

Phil Reid
Managing Director

Phil has worked in the oil and gas industry for over 25 years. He started his career with Kvaerner FSSL progressing through a variety of roles in subsea engineering, from manufacturing to leading some of their most complex projects all over the world.

He worked with the original J+S Subsea for a period before moving on to Genesis Oil and Gas as a Subsea Controls Engineering consultant. During that period, he was seconded to Centrica Energy (now Spirit Energy) which led to a permanent role as Lead Subsea Controls & Umbilical Engineer for Developments, Capital Projects and Operated Assets.

For almost a decade Phil successfully delivered Capital Projects from concept right through to project close out whilst also looking after the running of their subsea assets.

As part of J+S Subsea Limited, Phil will oversee the day-to-day operations and grow the business both in the UK and globally.
